DETAILED ACTION

Response to Amendment

This office action is in response to amendments filed on August 09, 2005. Original application contained Claims 1-32. Applicant elected Group I (claims 1-29, and 32) without traverse and requested to withdraw Group II (claims 30-31) from consideration at this time. The election/restriction filed on August 09, 2005 have been entered and made of record. Presently pending claims are 1-29, and 32.

Allowable Subject Matter

1. Claim 27 is allowed.
2. Claims 2-26, and 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 28, and 32 are rejected under 35 U.S.C. 102(e) as being anticipated by Sullivan.
U. S. Patent 5,953,528.

Regarding Claims 1, and 32 teaches and describes a device for communicating with other devices to allow them to access applications (Fig.1-5), comprising:

at least a first application; authentication means for authenticating a communicating device;
access control means accessible by a communicating device requesting access to the first application without the communicating device having been authenticated by the authentication means, and arranged to arbitrate whether access of the communicating device to the first application is granted or refused wherein if the arbitration requires an authentication of the communicating device, the access control means instructs the authentication means to authenticate the communicating device (col.9 line 55 to col.11 line 30).

Art Unit: 2131

4. Regarding Claim 28 teaches and describes a method of arbitrating the access of a requesting device to a service provided by a providing device (Fig.1-5) comprising:

 sending a request to access the service from the requesting device to the providing device;

 receiving the request at the providing device and passing it, without authenticating the requesting device, to an arbitration means interfacing the service; determining, in the arbitration means, whether to grant or refuse access to the first application by the requesting device, wherein if the determination requires an authentication of the requesting device, the authentication is performed during that determination and not previously (col.9 line 55 to col.11 line 30).
